

IBM Data Analyst Capstone Project

Final Presentation

Shay Delaney

17-Oct-2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- In order to keep pace with changing technologies, it is important to keep track of current and future trends
- This document attempts to outline trends in the following areas of IT and Consulting;
 - Programming languages
 - Databases
 - Platforms
 - Web frameworks
- This analysis should enable more informed data driven decisions for hiring in these areas.

INTRODUCTION

- This document is a presentation on the results of analysis conducted in order to identify trends for this year's report on emerging IT skills.
- Data has been collected from various sources including
 - Job postings
 - Training portals
 - Surveys
- This data has been analysed the insights and trends have been identified. We aim to answer the following questions:
 - What are the top programming languages in demand?
 - What are the top database skills in demand?

METHODOLOGY

- Data Collection
 - Scraped internet web sites
 - Accessed APIs to collect data in various formats like .csv files, excel sheets, and databases.
 - Stack Overflow Developer 2019 survey
 - GitHub job postings
- Data Wrangling
 - Once collection was complete, we made the data ready for analysis using data wrangling techniques.
- Data Exploration
 - Application of statistical techniques to analyse the data.
- Data Visualisation
 - Python Matplotlib
 - IBM Cognos Analytics for dashboards.

RESULTS

	Respondent	LanguageWorkedWith	LanguageDesireNextYear	DatabaseWorkedWith	DatabaseDesireNextYear	PlatformWorkedWith
0	4	C	C	MySQL	MySQL	Linux
1	4	C++	C#	SQLite	SQLite	Windows
2	4	C#	JavaScript	NaN	NaN	NaN
3	4	Python	SQL	NaN	NaN	NaN
4	4	SQL	NaN	NaN	NaN	NaN
...
74584	25142	Go	Python	NaN	NaN	NaN
74585	25142	HTML/CSS	R	NaN	NaN	NaN
74586	25142	PHP	NaN	NaN	NaN	NaN
74587	25142	Python	NaN	NaN	NaN	NaN
74588	25142	R	NaN	NaN	NaN	NaN

PROGRAMMING LANGUAGE TRENDS

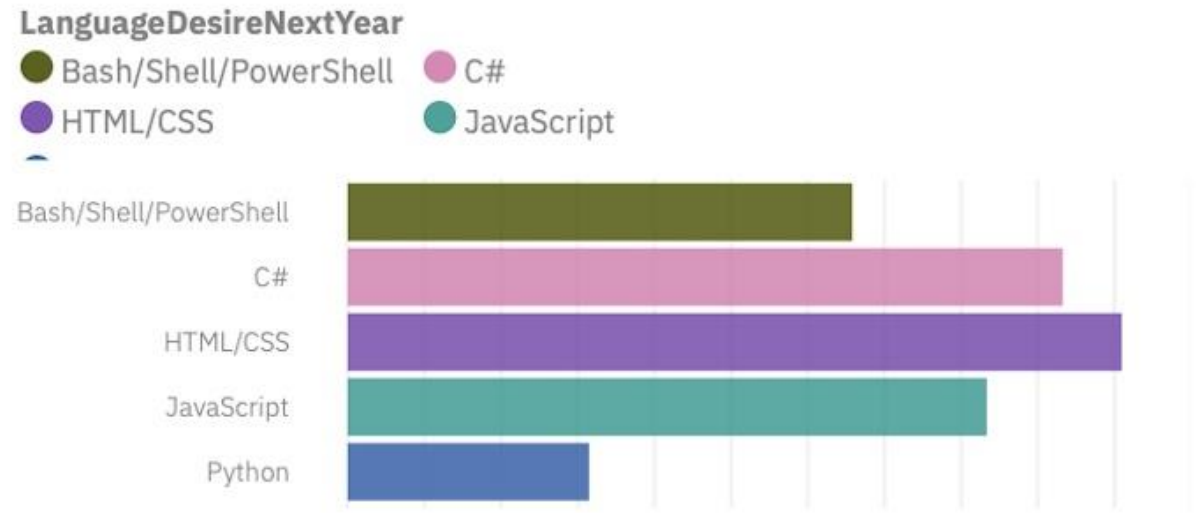

Current Year

Next Year

Top 5 Languages this year

Top 5 Languages desired next year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- HTML/CSS is the most popular language for both years.
- Bash and JavaScript remain strong but C# has increased in popularity
- Python is has replaced Java in the top 5 from current to next year.

Implications

- Web Developer are still in high demand
- AI and Data Analysis could be part of the reason Python has become more popular.

DATABASE TRENDS

Current Year

Top 5 Databases worked with this year

DatabaseWorkedWith

Next Year

Top 5 Database desired next year

DatabaseDesireNextYear

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is the most popular database
- Microsoft SQL Server is still very popular and widely used.
- MongoDB and Redis are the most popular NoSQL databases

Implications

- Opensource databases are preferable
- SQL databases account for the most this year and next.
- NoSQL databases have a good foothold

DASHBOARD

Please find the permanent link of the read-only view of the Cognos dashboard below.

Platforms desired next year

Top 10 Web Frameworks desired next year

DEMOGRAPHICS

Current Technology Usage

Future Technology Trend

Demographics

Respondents by Gender

Gender
● Woman ● Man

Respondents by Country

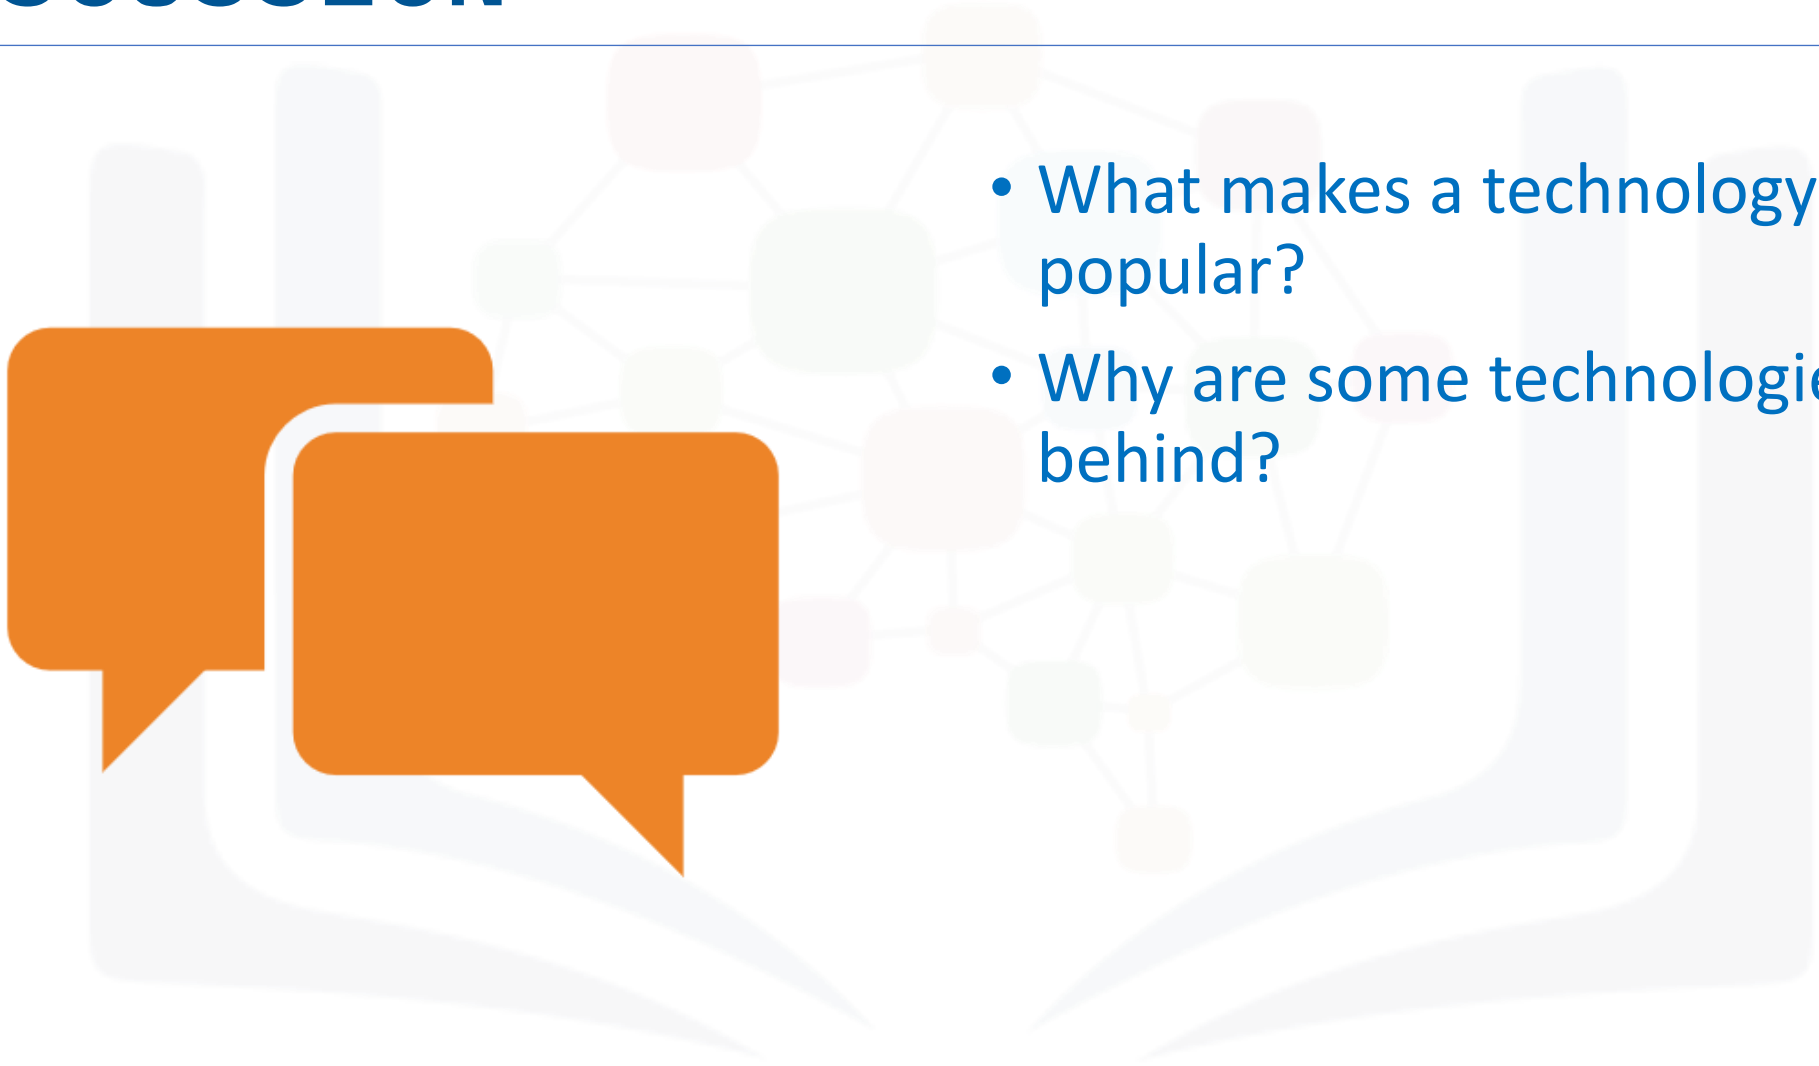

Respondent count by Age

Respondent count by Gender, classified by Formal Education

DISCUSSION

- 
- What makes a technology popular?
 - Why are some technologies left behind?

OVERALL FINDINGS & IMPLICATIONS

Findings

- In demand technologies can fluctuate from year to year
- React.js is predicted to be the most popular web framework replacing jQuery
- Linux, Docker and AWS are the most popular platforms.
- Gender imbalance as 93% more respondents were male

Implications

- Technologists should upskill where the demand is to keep themselves relevant in the market.
- Hire more people with frameworks experience like React.js and Vue.js
- Continue to staff Linux but employ people with Cloud experience – AWS, Docker, Kubernetes etc

CONCLUSION

- Hire more people with skills in future trend technologies
- Upskill those already employed
- Gender and Education

APPENDIX

- Include any relevant additional charts, or tables that you may have created during the analysis phase.
